Re: Moog, Inc. v. Skyrise, Inc. et al., No. 22-cv-187 (W.D.N.Y.)

Counsel:

We write regarding an additional production Skyrise is making today pursuant to the parties' March 11, 2022 Stipulation and Order (ECF Nos. 25, 28) (the "March 11 Order"). As it relates to today's production, we further reviewed search results from applying the 32 search terms Moog's counsel provided on April 12 (the "Moog Search Terms") against Skyrise's Gitlab source code repository. We identified two identical files from the repository that hit on a Moog Search Term. The files are found within directories containing files pertaining to the "Skyrise Desktop Test Environment" ("SDTE"). Because the files in these directories on their face are labeled Skyrise, we are producing the files to iDS, in compliance with the March 11 Order.

The files are being produced to iDS on a Seagate Ultra touch USB hard drive (Host Serial NAB25PKM).

As Skyrise continues reviewing its document and code repositories, as well as continues its searches of Skyrise-issued devices and email accounts of former Moog employees, Skyrise will produce any additional information responsive to the March 11 Order to Moog and/or to iDS, if such information is located.

The production of this information is not a concession or an admission that the information includes Moog's non-public data, and no such concession or admission should be inferred. Skyrise reserves all arguments to the contrary.

Sincerely,

Kate Dominguez
